

Software Development Intern

Are you a motivated recent graduate with, or student working toward, a degree in Software Development or Computer Science? Data I/O Corporation has an exciting opportunity for you!

Headquartered in Redmond, Washington, but a global company with subsidiary offices in Munich, Germany and Shanghai, China, Data I/O is the world's leading provider of device programming systems and solutions for global manufacturers of automotive, medical and industrial electronic products. Data I/O's solutions help bring products we use every day to life and many of our customers are leading the electric vehicle revolution, relying on Data I/O to keep their production lines running smoothly.

In this role, you will work with our very talented group of software development engineers on new products and product feature enhancements. This role will expose you to the software development process from start to finish, in an agile environment, providing you the opportunity to put into practice all that you've learned.

This opportunity will also give you knowledge of embedded systems and experience in software development applications in an embedded environment.

Minimum Requirements:

- Currently enrolled in a college or university or a recent graduate, available for a minimum of 20 hours per week.
- SW coding skill in Java and/or C# languages.
- Ability to take initiative and use sound judgment.
- Work effectively both independently and as part of a team.
- Eagerness to work in an embedded software environment.

PAID OPPORTUNITY - \$25/hour
